</head>

<body>
  <div class="page-header">
    <h1>Introduction to Bootstrap</h1>
    
  </div>
  <div class="container-fluid">
    <p> Get started with <mark>Bootstrap</mark>, the world's most popular
framework for building responsive, mobile-first sites, with Bootstrap <abbr
title="Content Delivery Network">CDN</abbr> and a template starter page. </p>

    <p>According to the official website, Bootstrap is the most popular
HTML, CSS, and JS framework for developing responsive, mobile first projects
on the web. Sounds great! Now how do I use it? It would be easy to send you
over to their Getting Started page and call it a day. Their setup guide is
indeed a host of useful information – links to CDNs, explanations on how to
install with Bower, npm, and Composer, information on integration with
Autoprefixer and LESS, a bunch of templates, licenses, and translations – but
you could read this blog here instead for a better and easier
understanding.</p>
    <span class="glyphicon glyphicon-pencil"></span>

    <p class="text-center">The list below shows the different version of
Bootstrap so far. <span class="glyphicon glyphicon-list-alt"></span></p>

    <ul class="list-group">
      <li class="list-group-item">Bootstrap 5</li>
      <li class="list-group-item">Bootstrap 4</li>
      <li class="list-group-item">Bootstrap 3</li>
```

```

    <li class="list-group-item">Bootstrap 2</li>
    <li class="list-group-item">Bootstrap 1</li>
  </ul>

```

```

    <p class="text-center bg-info"> The main features of bootstrap is, it
    is very simple and easy to use, huge JavaScript plugins are available, easily
    design mobile friendly website.</p>

```

```

</div>
<div class="container-fluid">
  <h2></h2>
  <table class="table table-bordered table-striped">
    <thead>
      <tr >
        <th>Features of Bootstrap</th>
      </tr>
    </thead>
    <tbody>
      <tr>
        <td>Easy to Use</td>
      </tr>
      <tr>
        <td>Mobile Friendly</td>
      </tr>
      <tr>
        <td>Prestyled Components</td>
      </tr>
    </tbody>
  </table>
</div>

```

```

<div class="container-fluid">
  <p class="text-left">Lets take a look at the components of
bootstrap:</p>
  <h1>CSS<span class="badge badge-secondary">Quoted</span></h1>
  <p class="text-justify">Copy-paste the stylesheet link into your head
before all other stylesheets to load our CSS.</p>
  <h2>JS <span class="badge badge-secondary">Quoted</span></h2>
  <p class="text-justify">Many of our components require the use of
JavaScript to function. Specifically, they require jQuery, Popper.js, and our
own JavaScript plugins. Place the following scripts near the end of your
pages, right before the closing bodytag, to enable them. jQuery must come
first, then Popper.js, and then our JavaScript plugins.We use jQuery's slim
build, but the full version is also supported.</p>

```
